*No action*

Dear General,

may I, as an Englishman, express surprise that no comment has been made by your office in relation to a bunch of subversive creeps who are exploiting current Senate Committee investigations under the title of:- "The Fifth Estate"!!

These Bastards are obviously bent causing as much disruption as possible to Intelligence Services, moreover their quote of "exposing the abuse of power" seems definitely a Communistic ploy to gain sympathy of sorts!! Surely there must be a way of "bottling up Butz"???

May I wish you a Happy New Year and a quieter one?

Sincerely

T.A.Bilton.

STAT

Senator,

Over the past months, you and your committee have done your utmost to subject to ridicule, denigrate, and, in general, undermine the very foundations of your country's intelligence services!!

The culminating point being the exposure of dedicated officials in various parts of the universe, details of whom are avariciously pounced upon by sensation seeking media, subsequently being exaggerated out of all proportion and resulting in the deaths of men doing a job of work which thereby ensures that you and your committee are safely esconced on your asses in Washington.

Please look closely at the enclosed cutting and put it in front of your goddamned committee, acknowledging at the same time that by your unnecessary witch-hunting tactics, you have unwittingly but definitely, stagemanaged the murder of one:-

Richard Welch, American national, 46 yrs of age, in Athens, Greece.!!

Your committee, by their sensation seeking methods (reminiscent of the Capone era), are nominating possibles to any international band of lunatics, seeking to further their political ends notwithstanding giving birth to creeps like Tim Butz, Philip Agee, Russo and Marchetti, all no-good throw-outs of your social system.

Frankly, sir, independent freethinking people like myself, are becoming more and more convinced that your committee's sole aim is assist the enemies of your country, and democracy, in the most flagrant and diabolical manner! Shame on the whole damn bunch of you!!!

You have put Mr. Colby and his colleagues in an impossible position with your demands, and for every American official who is intimidated abroad, the initial blame rests on your shoulders.

Surely the investigating committee would be better employed in "nailing down" that subversive bunch of bums calling themselves "The Fifth Estate"?????

We'll give them Fifth Estate if they show up over in this country, their fifth estate will be full of weeds. Forgive the pun.

In conclusion, I take this opportunity to wish you and committee of senatorial saboteurs, a most "unhappy New Year in every way, with the possibility of conscience aggravation for life in relation to Mr. Welch's fate by your country's enemies, whose activities your committee helps to thrive!!!
